› Professional Summary

Senior AI/ML Engineer with 7+ years of experience designing and shipping enterprise-grade, cloud-native systems, with the last 2+ years focused on applied Generative AI and LLM-based data products. Hands-on experience building Retrieval-Augmented Generation (RAG) pipelines, semantic search, vector databases, and AI agents on AWS Bedrock and Azure AI, and productionizing them as scalable APIs and microservices. Strong foundation in Python and Java, data pipelines, distributed/event-driven architecture (Kafka), and cloud infrastructure (AWS, GCP, Kubernetes, Terraform). Delivered regulated, high-stakes systems in banking and healthcare, with direct experience in secure data handling, governance, and auditability. Seeking a Data Scientist / AI Engineer role to apply this production-AI background to model-driven, data-intensive problems.

› Technical Skills

AI / GenAI & ML	LLM Applications, Retrieval-Augmented Generation (RAG), Prompt Engineering, Semantic Search, AI Agents, LangChain, AWS Bedrock, Azure OpenAI, OpenAI APIs, Vector Databases (pgvector), Knowledge Bases, Model Evaluation
Languages	Python, Java, SQL
Data & Backend	REST APIs, FastAPI, Spring Boot, Microservices, Event-Driven Architecture, Apache Kafka, Data Pipelines, Async Processing
Cloud & DevOps	AWS, Google Cloud Platform (GCP), Microsoft Azure, Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD, Prometheus, Grafana, Kibana
Data Storage	PostgreSQL, MySQL, MongoDB, AWS S3, Query Optimization, Workflow & Metadata Persistence
Security & Practices	OAuth2, JWT, Secure API Design, System Design, Agile/Scrum, Clean Architecture

› Professional Experience

Infosys Limited	📅 Jan 2024 – Present
<i>Senior AI/ML Developer</i>	📍 Bangalore, India

- Built enterprise GenAI solutions using AWS Bedrock, Knowledge Bases, Retrieval-Augmented Generation (RAG), semantic search, and LLM-powered workflows for document understanding and enterprise search.
- Developed Python-based backend services and APIs supporting AI workflow orchestration, document processing, knowledge retrieval, and intelligent recommendations.
- Designed scalable microservices integrating enterprise systems, vector search capabilities, and AI-powered customer onboarding journeys, including KYC validation and contextual response generation.
- Evaluated and integrated both AWS Bedrock and Azure OpenAI model endpoints to support multi-cloud LLM workflows and vendor flexibility.
- Containerized applications using Docker and deployed cloud-native workloads on Kubernetes; automated infrastructure and deployments with Terraform, Jenkins, and GitHub Actions.
- Designed PostgreSQL-backed services for workflow persistence, metadata management, and AI application data storage.
- Developed secure enterprise APIs using JWT-based authentication, role-based access control (RBAC), and compliance-driven security practices.
- Led monolith-to-microservices modernization, improving deployment agility and system scalability by 30%.

Cognizant Technology Solutions	📅 Oct 2021 – Dec 2023
<i>Senior Application Engineer – Client: Agilent Technologies</i>	📍 Bangalore, India

- Designed cloud-native, event-driven microservices using Spring Boot, Apache Kafka, and Amazon Cloud Platform for high-volume, real-time data processing.
- Led secure healthcare data migration initiatives to AWS, with a strong focus on compliance, auditability, and data governance – directly relevant to regulated, sensitive-data ML environments.
- Built asynchronous processing systems and intelligent data pipelines for enterprise-scale workloads.
- Developed distributed backend services supporting high-volume, real-time data processing.
- Collaborated with global engineering teams to validate cloud architecture, migration workflows, and regulatory compliance requirements.

Tata Consultancy Services (TCS)

Application Engineer – Client: Assam Commissionerate of Taxes

📅 Feb 2019 – Sep 2021

📍 Ahmedabad, India

- Developed Spring Boot services and enterprise APIs backed by PostgreSQL for large-scale government tax processing systems, including VAT return processing.
- Improved application performance by 20% through optimization, multithreading, SQL query tuning, and scalability enhancements.
- Implemented monitoring and performance validation using Prometheus and JMeter.

Let's Nurture Infotech Pvt Ltd

Python Developer

📅 Jul 2018 – Jan 2019

📍 Ahmedabad, India

- Developed Flask-based REST APIs and geolocation services (geohashing) in Python.
- Built automation scripts for data processing, reporting, and backend workflow optimization.

› Applied AI Projects

GenAI Customer Onboarding & Personalization Platform

- Built AI-powered onboarding assistants using AWS Bedrock Agents and enterprise Knowledge Bases, with RAG for enterprise document querying and semantic search.
- Designed LLM-driven workflows for KYC validation, intelligent recommendations, and contextual customer responses, supported by a scalable microservices architecture.

› Certifications

- 🌟 AWS Certified Solutions Architect – Associate
- 🌟 AWS Certified AI Practitioner
- 🌟 Microsoft Certified: Azure AI Fundamentals (AI-900)
- 🌟 Google Cloud – Deploy Multi-Agent Systems with Agent Development Kit (ADK) & Agent Engine
- 🌟 MongoDB Certified Developer

› Education

🎓 Bachelor of Technology (B.Tech)

Institute of Technical Education and Research (ITER), SOA University, Bhubaneswar, India

CGPA: 8.6
